Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 February 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

1. This application has been examined. The response filed 2/24/04 has been entered.
2. Claims 1-44 are rejected under the judicially created doctrine of double patenting over claims 1-54 of U. S. Patent No. 6668177 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: mobile terminal displaying selectable icons, receiving plurality of messages, comparing characteristics associated with the messages to context values, determining proximity associated with message source, associating icons with the messages, representing best match message as enlarged icon, representing closest proximity message as enlarged icon (claims 21-24 especially).

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Art Unit: 2174

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 25-26 and 30-32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nykanen (6362841) and Pivowar et al (6466236).

5. Regarding claim 25, Nykanen shows the mobile terminal displaying graphical icons (Figure 2), user input that permits selection of the icons (column 7 lines 1-15), , displaying an icon associated with matching user specified context (column 6 lines 55-67, column 7 lines 35-50), and specifying a second icon demonstrating closer proximity to the source than the first icon (column 8 lines 7-46). Nykanen does not specifically show that the way to display or distinguish the icon is by enlarging it, but does mention efficiently notifying a change to the user. Furthermore, Pivowar et al show efficiently notifying change to a user in a mobile terminal, by enlarging the icon (column 3 lines 12-25, column 5 lines 20-40). It would have been obvious to a person with ordinary skill in the art to have the enlarging in Nykanen, because it would be an efficient way to notify change to a user.

6. Regarding claim 26, the icon is extracted from the message (Nykanen column 7 lines 30-51).

Art Unit: 2174

7. Claims 30 and 32 show the same features as claims 25.

8. Regarding claim 31, the icons may be enlarged from among the group (Pivowar et al column 3 lines 12-30). This is part of the feature, whose obviousness to combine is explained above.

9. Applicant's arguments filed * have been fully considered but they are not persuasive. The crux of applicant's arguments lies in the interpretation of proximity. Regarding the double patenting rejection: The recitation of the priority and proximity sections of the display is broad and in fact this is brought out in the '177 patent. Regarding the art rejection: Nykanen does in fact specify the second icon such that the closer proximity is shown. Applicant's mention McCann and it is unsure exactly to what applicants are referring. Also, regarding Pivowar, enlarging the icon would definitely signify a change, as well as draw the user's attention. Applicant is invited to contact examiner at 703-307-0765 for further review.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2174

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
